EDUCATION

Narayana Vidyalayam, CBSE

Secondary School Education, 91.80%

Nagpur

2021

St. Paul Junior & Senior College, Maharashtra State Board

Higher Secondary Education, 62 %

Nagpur

2023

Yeshwantrao Chavhan College of Engineering, GPA - 7.90

Bachelor of Technology in Computer Science and Engineering

Nagpur

2023 – 2027

EXPERIENCE

Microsoft AI Azure (AICTE)

4 Weeks, Online mode

Intern May – June 2025

- Completed a virtual internship focused on Artificial Intelligence and Microsoft Azure cloud services.
- Deployed and managed AI solutions, including an object detection computer vision project using Azure Cognitive Services.
- Gained hands-on experience with cloud computing, model training, and AI service integration.
- Developed an understanding of real-world AI deployment pipelines and scalable cloud architecture.

SKILLS

Programming Languages – Java

Web Technologies – HTML, CSS, JavaScript

Database & Tools – MySQL, VS Code, Git, GitHub

AI & Cloud – OpenCV, YOLO, Microsoft Azure, Azure Machine Learning

PROJECTS

Bank Management System | React, Node.js, Express.js, MongoDB, Vercel

[GitHub](#) | [Live Demo](#)

- Built a full-stack MERN banking app with secure user authentication and bcrypt password hashing.
- Designed 7+ RESTful APIs in Express.js for deposits, withdrawals, and peer-to-peer transfers.
- Engineered atomic MongoDB transactions to ensure data consistency during fund transfers.
- Deployed on Vercel with serverless API functions and a responsive React frontend.

Prakriti Connect | React, Node.js, Express.js, MongoDB, Vercel

[GitHub](#) | [Live Demo](#)

- Developed an Environment Event Management & Volunteer Coordination System featuring event discovery, volunteer registration, event tracking, notifications, role-based access, and analytical dashboards for managing participation and community activities efficiently.

Weather App | JavaScript, HTML, CSS, Tailwind CSS

[GitHub](#) | [Live Demo](#)

- Built a responsive weather application with a custom glassmorphic UI, displaying real-time current conditions and hourly forecasts.
- Integrated a public Weather REST API to fetch live temperature, humidity, wind speed, and condition data based on user-entered city input.
- Implemented client-side error handling for invalid city searches and failed API responses to keep the app resilient.
- Deployed the application on Vercel with a static-site configuration for fast, global page loads.

ACHIEVEMENT

Hackathon Competed in Smart India Hackathon 2025 and a college-level hackathon, contributing to teamwork, innovation, and technical solution design.

College Event Organization (YCCE TechFest) | Problem Solving, Team Collaboration, Communication

2026

- Organized and coordinated college events by managing planning, logistics, task delegation, participant coordination, and timely execution while collaborating effectively with student teams
- Applied problem-solving and critical-thinking skills to address operational challenges, prioritize tasks, adapt to changing requirements, and maintain a smooth and successful event experience
